SAMUEL HEATH

Concealed Door Closers

Our concealed door closers have been closing doors in a wide variety of commercial, leisure, public and domestic buildings for over 30 years, establishing themselves as the preferred choice for specifiers and contractors throughout the world.

Recognised as an effective means of providing quiet, unobtrusive and economic closing, Perko® and Perkomatic® create clean, unhindered aesthetics for a door, corridor and room, eliminating the need for unattractive and intrusive surface mounted closers.

Just because our door closers are concealed doesn't mean we have neglected their looks; both Perko® and Perkomatic® forends are now available with polished brass, chrome, satin chrome and bronze metal antique finishes to complement traditional, retrospective and contemporary decorative styles.

Great looks are matched by the exceptional levels of performance and quality for which all Samuel Heath products are renowned.

Durability and quality are assured by testing to UL228 and production under factory control systems accredited to BS EN ISO 9001: 2000.

Installation is straightforward, involving simple drill and rebating procedures according to the template supplied with each closer. Following this, each closer can be quickly and easily adjusted to suit various latchbolt conditions:

On Perko® the closure rate can be varied, whilst Perkomatic® features an adjustable latching action.

- Concealed - enhanced aesthetics
- reduced opportunity for vandalism
- Designed for light to medium duty installations
- Manufactured under BS EN ISO 9001: 2000 quality systems
- Tested to UL228

Perko®

Perko® is the original concealed door closer, offering an economic means of providing automatic closing for internal doors up to 110 lbs in weight in light to medium use applications.

Solid brass anchor plates, powder coated mechanism housing and precision-engineered chain add to its appeal. Supplied with fixing screws and full fitting instructions.
