DOOR HANDING

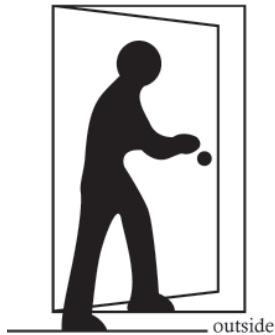

Inside of Door - The **Inside** of a door refers to the side of the door that “faces the room.” For example, for a bedroom door on a hallway, the **Inside** of the door would face the bedroom.

Outside of Door - The **Outside** of a door refers to the side of the door that faces away from the room. It is generally more visible to visitors, and therefore on roses this side has no visible screws. On a bedroom door, the **Outside** would face the hallway.

TO IDENTIFY DOOR HANDING: Face Door From the Outside

Opens Inward*

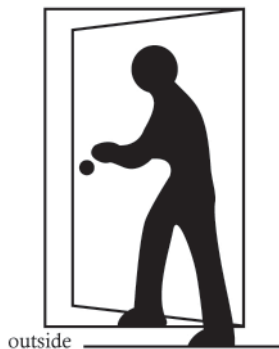

Left Hand Reverse Door

*Hinges on Left

Handing of doors is important when selecting split finish or split design combinations with the PRIVACY FUNCTION.

Handing is not required for standard Passage, Privacy, Mortise or Dummy functions.
