For PowerPlex 2000 only:

Lock is ready when front lever is depressed	ON	OFF	1/10 sec	Once
Lock's stored power is starting to fade	OFF	ON	1/10 sec	1 sec

(A)= 1/10 second; (B)= Twice; (C)= Can be observed only when you pump the lock's lever

E2000 Operation: Enter your valid PIN to Access the lock and/or to program the lock at its keypad.

PowerPlex 2000 Operation: This model is a self-powered lock. To access and/or program the lock, you must first generate power by depressing the front lock lever down at least once. This energizes the lock temporarily for a few seconds , enough time for you to enter your PIN and open the lock, or start to program the lock with a command sequence.

To begin, put lock in programming mode by pressing: #Master Code#
