E-Plex 3000
Electronic offline lock

E-Plex series of locks creates a range of access control solutions. They are ideal for cost effective access control or augmenting an existing access control system allowing you to utilize existing credentials and infrastructure.

Quick and easy to install and maintain, the E-Plex 3600 and 3700 Series can function in both wireless or offline modes using dormakaba's Keyscan Aurora or Keyscan LUNA Access Control software platforms.

The complementary Keyscan LUNA Access Management Software platform is recommended for small offline only installations that are ideal for small business.

The E-Plex 3600 model supports 13.56MHz high-frequency credential formats (MIFARE, DESFire, and iCLASS) and PIN codes.

The E-Plex 3700 model supports 125kHz standard security "prox" credential formats and PIN codes.

Also available in standard models (E-Plex 5600/5700)

Features & Benefits

Programming
Locks are programmed using:
- dormakaba's Keyscan Aurora Access Control software platform in both wireless or offline modes (requires M-Unit handheld)
- The complementary Keyscan LUNA Access Management Software platform is recommended for small offline only installations that are ideal for small business. (requires M-Unit handheld)
- E-Plex Enterprise Software provides easy management of doors and users. Upgradeable to wireless. (wireless not available on locks purchased prior to Oct. 2011)
- Or by keypad with LearnLok feature (300 available PIN codes)

Number of Users
- Keyscan Aurora: Up to 45,000
- Keyscan LUNA: Up to 10,000
- E-Plex Enterprise: Up to 3,000
- Stand-alone: Up to 300 access codes (LearnLok™)

Scheduling
- Up to 16 different access schedules may be programmed into reader.

Ease of Installation
- No wire to or through the door

Audit Capability
• Up to 30,000 events with optional software

Operation Modes
• Access (via Credential)
• Lockout
• Passage—can be toggled on/off or pre-programmed to re-lock manually or via software
• Scheduled Access

Authority Levels
Six different levels control who has access to specific lock functions, including: Service codes from single event up to four-day access, programmable in advance

Holiday/Vacation
Up to 32 holiday/vacation blocks may be programmed.

User Parameters
**Code length**—Adjustable to accept 4 to 8 digits
Anti-tamper lockout—Adjustable from 3 to 9 invalid attempts with an adjustable period of 0 to 90 seconds
**Relock time**—Adjustable from 2 to 20 seconds
Battery Operation—Batteries located in tamper-proof base of outside housing. Four AA Alkaline batteries provide up to 120,000 cycles for E-Plex 3600/3700 (performance varies based on settings). Lock data is maintained if batteries fail. Warning lights notify low battery status.
Ease of Installation—No wire installation—eliminates wiring to or through the door—no risk of pinched wires
