3. ARM ALIGNMENT

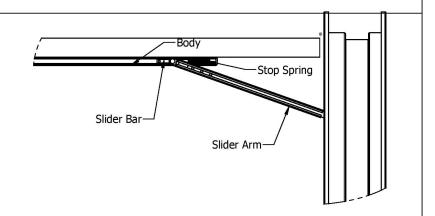

Open the door then align and insert the Jamb Arm into the Slider Arm.

4. SETTING DESIRED DOOR OPENING

If it applies, disengage the hold open engagement switch (step 5a). With the door held at the desired maximum opening angle, position the slider bar against the stop spring. Tighten the three adjustment arm set screws. Tighten to a minimum of 20 in-lbs (WARNING: over tightening may result in damage to the main arm).

If dead stop is required, position the door 5-7 degrees less then the desired dead stop. Then tighten as instructed above.

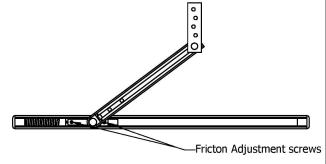

5a. OPTIONAL HOLD OPEN (6017)

Hold Open Selector Switch Hold Open Adjusment Screw Using a Philips screwdriver, turn the

Using a Philips screwdriver, turn the hold open adjustment screw clockwise to increase the hold-open tension and counter-clockwise to lower the tension.

5b. OPTIONAL FRICTION HOLD OPEN (6015)

Using a 5/64" [2mm] hex key, turn the friction adjustment screws clockwise to increase the friction and counter-clockwise to lower the friction. Pressure should be evenly distrubted between both screws

✓Hold Open engagement switch - **OFF** position
