2904 - Constant Power for Fail Safe and Fail Secure Locking Devices with Fire Alarm Input

2904

Power supply 24VDC, 2A with onboard control board for fail safe and fail secure lock devices and automatic door operator

Applications

Provides power and control for openings with an electrified locking device and automatic door operator

PRODUCT SPECIFICATIONS

Case Quantity:
1

Electrical Specifications:

2A @ 24VDC - Output Voltage (Class 2 Rated)
900mA @ 120 VAC 50/60Hz | 600mA @ 240VAC 50/60Hz - Input
Voltage (Auto Sensing)
Overload, Over Voltage, Short Circuit - Protection

Features:

Filtered and regulated 24 VDC output
Built-in fail-safe or fail secure locking device controller
Built-in dry contact output for automatic door operator input
Adjustable time delay
Auxiliary 24 VDC constant voltage output (1 amp max output)
Separate input for activation switch on entry and exit side of the opening
Fire alarm input

Product Name:

MLR & Auto Operator Access Control Power Supply

Size:

10-1/4" Height
10-1/4" Width
4-1/4" Depth

Warranty:

One-year
