

721DR/DW Handing Chart

For Key-Retaining Function

Key-retaining: The key cannot be removed from the lock when the bolt is retracted and in the unlocked position.

Purpose: The key-retaining function is used so that cabinets are not left unlocked.

Handing: Specify 721DR-KR for door key retaining or 721DW-KR for drawer key retaining. To install for any of the below handings, cycle the lock into the locked position before inserting the core.
