

NARROW STILE CODELOCK

Narrow stile mechanical Code lock suitable for aluminum doors. An affordable alternative to electronic keypads, electrical strikes, magnetic locks and other systems used on aluminum framed doors.

The narrow stile lock is medium duty, ideal for new or retrofit applications. Designed to be retrofitted to Adams Rite or similar ANSI round cylinder mortise deadlatches. The locks have a variety of access control functions, allowing the user flexibility on how to manage entry - by key, code or passage function entry.

Easy to install

Suitable for aluminum doors

Limited lifetime warranty*

8,191

Total code combinations

LOCK MODELS

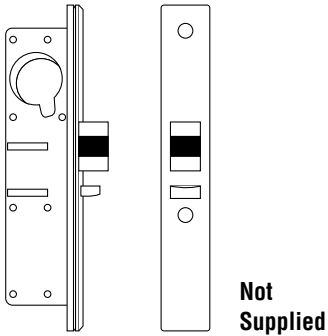

Front and Back Plates

Narrow stile Codelock complete with cams and lever handles.

ADDITIONAL FEATURES

Latch Options

The CL460 and CL465 models are designed as a retrofit for Adams Rite 4510 lockcase or similar style ANSI round cylinder mortise deadlatches.

Code Change Method

Requires removal of the lock from the door. The code can be changed by repositioning the tumblers in the code chamber. Locks are supplied with a random code commencing with the 'C' clear button.

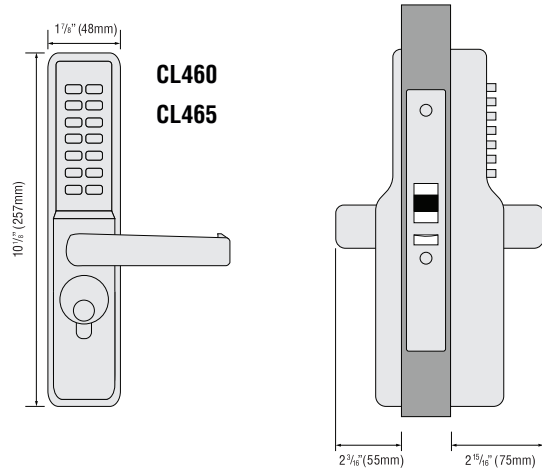

Passage Function

The CL465 model provides a passage function. These models feature a black dot on the 'Y' button. When the 'Y' button is pressed along with a correct code input, the lever will retract the latch freely until disabled.
